

MD. TAREQ AZIZ SIFATE

SOFTWARE ENGINEER

[GitHub](#) | [LinkedIn](#) | +8801857856484 | mdtareq.me@gmail.com | Mirpur, Dhaka-1216

PROFESSIONAL SUMMARY

Software Engineer with 5+ years of experience delivering scalable enterprise web applications across fund management, HR & payroll, e-commerce, recruitment, and library management domains. Core stack: PHP, Laravel, Vue.js, and MySQL. Experienced in full-stack delivery — REST API design, database architecture, third-party integrations, and responsive frontend implementation. Track record of building systems that automate high-effort manual workflows and deliver measurable operational impact.

TECHNICAL SKILLS

Languages: PHP, JavaScript (ES6+), Ruby, Python

Frameworks: Laravel, Vue.js, Nuxt.js, Ruby on Rails, CodeIgniter, CakePHP

Frontend: HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design

Databases: MySQL, PostgreSQL, MongoDB

DevOps & Tools: Docker, Git, Linux/Unix CLI, Postman, Xdebug, PHPStorm, VS Code

Integrations: Stripe, Twilio, SSLCommerz, Paperfly Courier API

PROFESSIONAL EXPERIENCE

Software Engineer | Accord Technologies Limited | June 2025 – Present

- Delivering multiple enterprise platforms in PHP/Laravel and MySQL within a collaborative engineering team, owning features end-to-end from database design through frontend delivery
- Fund Management System:** Built Provident & Gratuity Fund platform — client reported potential to automate workflows requiring 80% of their accounting team's manual effort
- HR & Payroll System:** Salary processing automation reduced manual calculation time by up to 3 hours per cycle, client-reported
- Investment Management System:** Corporate portfolio tracking and fund allocation modules for finance stakeholders

Software Engineer | Wafi Solution | March 2024 – May 2025

- Single-page checkout** optimized for social media traffic — eliminated multi-step drop-off points, directly improving purchase conversion
- Vendor onboarding flow** replaced fully manual admin process — client-reported reduction in onboarding support tickets
- Delivered full-stack features across WordPress/Laravel hybrid systems; managed Docker and WordOps deployments across multi-site Linux environments

Software Engineer | Misfit Technologies | April 2023 – February 2024

- Led paper-to-digital platform delivery** — fully replaced manual library operations with a production web system serving real end users across a 5+ engineer distributed team
- Built backend services in Ruby on Rails and PostgreSQL; contributed Python modules; wrote tests reducing regression risk; resolved production bugs under pressure

Software Engineer | JRK International Ltd. | June 2020 – March 2023

- Sole backend developer** on 3+ enterprise applications — owned full API design and MySQL schema delivery for recruitment, HR & payroll, and sports management systems
- Integrated 4+ third-party APIs** (Stripe, Twilio, SSLCommerz, Paperfly); optimized high-volume MySQL queries; built microservice architecture components

SELECTED PROJECTS

Fund Management System — *Laravel, MySQL, Docker*

- Provident & Gratuity fund engine with multi-tier contribution calculations, vesting schedules, interest accrual, and exit settlement workflows

British Marketplace – Multi-Vendor E-commerce — *Laravel, MySQL*

- Backend rebuild for large-scale marketplace — multi-currency transactions, concurrent API handling, international checkout flows

Recruitment Management System — *Laravel, MySQL*

- End-to-end backend ownership — RBAC, multi-stage hiring workflows, candidate tracking, REST API contract for frontend integration
